## Historic Mill dedicated Sunday

The historic John Wood Old Mill in Deep River was dedicated last Sunday before a large crowd. The mill was built by Wood, one of Lake County's first settlers, in 1838, and was rebuilt by his son, Nathan, in 1876. It was placed on the National register of Historic Places in 1975. The mill is scheduled to begin operation in the Spring of 1977, when the wheel will once again laze through the waters of the Deep River.
